## BitcoinCash.org: where to find Bitcoin Cash

The screenshot shows a file sharing interface. On the left is a blue folder icon with a cloud inside. To its right, the text reads: "File was found and ready to download!" followed by "UPDATED 14 HOURS AGO". Below this, it says "Fastest Source: useenet.nl" with a checkmark under the domain. A note below that says "Click the **download button** and select one of the found **cloud sources**." There is a blue "Download" button with a download icon and a lock icon with the text "SECURE SCANNED". To the left of the button is a rating of "6.4" with five stars and "2885 VIEWS". Below the main content area, a message says "You need to [log in](#) before you can post comments." At the bottom, there are three icons with labels: "Navigation" (a signpost icon), "Registration" (a folder with people icon), and "FAQ" (a lifebuoy icon).

The "project" type of the metadata produced by the NodeTieredComputeMetadata key is "projects/", as a Google Cloud project ID, because it is used as a project for some Google Compute Engine functionality.", "type": [ "string", "null" ] } }, "\$schema": "", "type": "object" } Causal Thinking Matters: The Self-Regulation Benefits of Sidetrack Thinking about Fatigue. Focusing on the negative (such as fatigue or failure) can be a hindrance to goal achievement, whereas focusing on the positive (such as strength and competence) can facilitate task performance and enhance satisfaction and well-being. Self-regulatory resources are critical to mental functioning and they can be depleted to the point of necessitating recovery. However, research on self-regulatory resources has focused mainly on the depletion of energy resources (i.e., cognitive, physical, or emotional fatigue). We investigated whether thinking about fatigue itself could facilitate self-regulatory recovery and affect subsequent performance of a demanding cognitive task. We hypothesized that thinking about fatigue leads to greater subsequent cognitive and physical self-regulatory recovery, and consequently, improved performance on a challenging self-regulatory task. To this end, participants (N = 104) performed a behavioral task under two conditions of interspersed rest periods: fatiguing vs. control, in an effortful vs. non-eff
